<><><><><><> Volunteer for Research! <><><><><><>

Connecting with clinical trials of HIV/AIDS therapies is a new opportunity
for visitors to The Body.

The Body is compiling a database of volunteers' health information for
possible participation in upcoming medical trials. Clinical researchers and
labs often contact The Body for information regarding volunteers for
participation in various clinical trials and studies, and The Body is
building this database for the purpose of facilitating these requests.
Currently, this program is available only to citizens and permanent
residents of the United States.

For details concerning this opportunity, see the following:
<http://www.thebody.com/surveys/health_survey.html>
